- > Pictet-Global Environmental Opportunities (the "Fund") applies a capital growth strategy, by investing principally in equities or equities related securities issued by companies throughout the world (including emerging markets). It will invest mainly in securities issued by companies active throughout the environmental value chain, for example in sectors such as but not limited to agriculture, forestry, clean energy and water.
- > The Fund's investments are concentrated in the environmental sector. The Fund may be adversely affected by or depend heavily on the performance of the securities issued by companies in the environmental value chain. Therefore, this may have an adverse impact on the Fund's NAV.
- > The Fund may have exposure to emerging markets including but not limited to China. Due to the political and economic situations in emerging countries, investment in the Fund presents, among others, greater legal, political, social, economic policy, volatility, currency, exchange, tax, capital repatriation and liquidity risks.
- > Dividend is not guaranteed. The Fund aims to pay dividend annually. Dividends payable (if any) from dy distribution shares may be paid out of the capital. Investors should note that the payment of dividends out of capital represents a return or withdrawal of part of the amount they originally invested and/or any capital gains attributable to the original investment. Besides, distributions, including distributions involving the payment of dividends out of the Fund's capital, may result in an immediate reduction in the NAV per distribution share.
