⁴ "Net distributable income" means the net investment income (i.e. dividend income and interest income net of fees and expenses) attributable to the relevant share class and may also include net realized gains based on unaudited management accounts. "Net distributable income" which is not distributed in a month of a financial year will be carried forward as net distributable income for the next month within the same financial year. % of dividend paid out of net distributable income for the month = undistributed cumulative net distributable income as of the month concerned / dividend payable for the month. The calculation of the above cumulative figure is based on the financial year running from 1 October to 30 September
