RI TRANSPARENCY REPORT

2020

Pictet Asset Management

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2020 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
⚠	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

SG 01.4

Describe your organisation's investment principles and overall investment strategy, interpretation of fiduciary (or equivalent) duties, and how they consider ESG factors and real economy impact.

We are convinced that Environmental, Social and Governance (ESG) considerations can help us make better long-term investment decisions for our clients.

For decades, sustainability has been central to our way of thinking. Since the Pictet Group was founded in 1805, we have aimed to ensure the prosperity of our clients over the long term. In doing so, we have instinctively considered the interests of future generations.

Pictet Asset Management believes in responsible capitalism and takes an enlarged view of the economy and its interactions with civil society and the natural environment.

Consistent with our fiduciary duty to act in the best interests of our clients and our adherence to the UN Principles for Responsible Investment (UN PRI), we are committed to integrating material ESG criteria in our investment processes and ownership practices with a view to enhance returns and/or mitigate risks. We also aim to embed ESG in our risk management and reporting tools in order to maintain high standards of transparency and accountability.

Our commitment to responsible investment is supported by a set of basic principles covering six domains: Investment process, Active ownership, Exclusion toolbox, Risk management, Portfolio reporting, Marketing & Communication.

SG 01.5

Provide a brief description of the key elements, any variations or exceptions to your investment policy that covers your responsible investment approach. [Optional]

Our commitment to responsible investment is supported by a set of basic principles covering six domains:

1. Investment process: Material ESG issues are embedded in research and investment processes with a view to enhance returns and/or mitigate risks. To help integrate ESG factors all investment professionals have access to a wide range of ESG data from various providers. Each provider was selected for its leading edge on specific ESG datasets.
2. Active ownership: Voting rights are exercised systematically in the best interest of our clients. Where appropriate, we engage with corporate and sovereign issuers in order to positively influence ESG performance.
3. Exclusion toolbox: Pictet Asset Management implements an exclusion policy on companies involved in the production of anti-personnel mines, cluster munitions, biological & chemical weapons (including white phosphorous) and nuclear weapons from countries not signatory to the Treaty on the Non-Proliferation of Nuclear Weapons (NPT).
4. Risk Management: ESG forms an integral part of risk management. Investment teams monitor ESG news flow of relevant issuers and take action where material changes occur. Investment Risk team provides quantitative information and qualitative comments on portfolio ESG characteristics in Quality Reviews.

5. Portfolio reporting: Relevant ESG metrics and qualitative comments are being included in standard reports of products/strategies that integrate ESG in their investment process.

6. Marketing & Communication: ESG metrics at portfolio level are developed by the Reporting team with the support of the ESG team. ESG features such as Proxy voting activity, Carbon footprint, Governance profile, Controversy profile are included in relevant marketing material and internal & external communications.

SG 03.1

Indicate if your organisation has a policy on managing potential conflicts of interest in the investment process.

Yes

SG 03.2

Describe your policy on managing potential conflicts of interest in the investment process.

Pictet Asset Management has taken reasonable steps to identify potential conflicts of interest. We take all appropriate measures to manage any conflicts of interest arising, which includes the following:

- Separation of the fund management and dealing functions
- Research Commission Governance Committee oversight
- The pre-allocation of orders
- A fair trade allocation policy. Where orders that cannot be executed in full, reduced allocations are normally made on a pro-rata basis, unless this would result in uneconomic allocations to clients
- Fair allocation of investment ideas
- Side-by-side management (performance fee funds vs non-performance fee funds)
- Trading with affiliates only where permitted by clients, and where best execution can be obtained and monitored
- Reconciliation of commission volumes traded via Commission Sharing Agreements
- Periodic review and assessment of services paid under CSA arrangements to ensure eligibility
- No proprietary trading
- A strong Code of Ethics imposing strict rules on staff personal trading and the giving or receipt of gifts or entertainment, including the prior approval of the Compliance department.

Our Compliance department undertakes regular monitoring to provide assurance to senior management that conflicts of interest are effectively assessed and managed.

LEI 01.2

Describe your organisation's approach to ESG incorporation and the reasons for choosing the particular strategy/strategies.

At Pictet Asset Management we offer a complete spectrum of investment solution that incorporate ESG factors in multiple ways. These include:

1. ESG Integration into long-only strategies (eg equity & fixed fincome long only strategies). This is driven by our conviction that ESG considerations can help us make better long-term investment decisions.
2. Best-in-class strategies (eg European Sustainable Equities, Emerging Sustainable Equities, Swiss Sustainable Equities, Global Sustainable Credit, Sustainable EMD Blend). These are designed for clients who wish to actively support and benefit from superior corporate responsibility.
3. Environmental/ Social thematic strategies (eg Global Environmental Opportunities, Nutrition, Clean Energy, Timber, Water, Smart City, Biotech, Health). These offer the possibility to invest in products and services that provide solutions to environmental problems. ESG factors are fully integrated into company analysis.

In all three cases we apply a firm-wide exclusion of companies involved in controversial weapons.

LEI 01.3

If assets are managed using a combination of ESG incorporation strategies, briefly describe how these combinations are used. [Optional]

"Screening alone" include strategies which implement a best-in-class approach. Additionally, we apply a firm-wide exclusion of companies involved in controversial weapons.

"Screening and integration strategies" include our conventional strategies which integrate ESG factors into their investment decision process and exclude companies involved in controversial weapons. Additionally, we apply a firm-wide exclusion of companies involved in controversial weapons.

"All three strategies combined" include our Environmental & Social thematic strategies. These invest in companies with clear and strategic exposure to companies that contribute to solve environmental / social challenges through innovation, technology and intelligent use of natural resources. ESG considerations are integrated in the fundamental analysis of companies and have a direct impact on the holding weights in the portfolio. Additionally, we apply a firm-wide exclusion of companies involved in controversial weapons.

LEA 01.6 Additional information [optional]

Pictet Asset Management's Active Ownership Policy is currently being reviewed and will be available on our website in Q2 2020.

Engagement:

We consider it our fiduciary duty to engage selected corporate issuers in order to positively influence a company's ESG performance and to protect or enhance the value of our clients' investments. We press management to adopt appropriate policies, practices and disclosure in line with established best practice but focus on those that lag behind or where accidents or events bring to light structural weaknesses in their governance and/or management of environmental and social issues.

Where appropriate, we engage companies on material ESG issues, to satisfy ourselves that they fully understand and address them effectively over the short, medium and long term.

We engage on behalf of our equity (active and passive) and corporate debt holdings, through a combination of in-house-led discussions, third-party engagement services and via collaborative institutional investor initiatives.

The foundation of our understanding of corporate issuers is the thousands of regular meetings that our investment teams attend each year with companies' management. Material ESG issues are often on the agenda. These discussions contribute to our understanding of all dimensions of companies' strategies, plans and operations, and inform our investment analysis and decision-making.

In all of our engagement, we set or support specific objectives, we track progress against these objectives and in some cases, if they are not met, we may reduce or sell our holdings.

Our approach to engagement has three tiers.

Tier 1: The first tier of our active ownership is a programme of targeted engagement with corporate issuers. These companies were identified jointly by investment teams and our ESG team. Each company was selected because we had significant ESG concerns and the strategic nature or size of our holding was significant enough to indicate that our engagement would likely be effective.

Tier 2: Taking part in collaborative engagement with other investors forms the second tier of our approach. The collaborative initiative we have most actively supported to date is Climate Action 100+. Climate Action 100+ is a five-year initiative, launched in December 2017, led by investors. The initiative is designed to implement the investor commitment first set out in the Global Investor Statement on Climate Change in the months leading up to the adoption of the historic Paris Agreement in 2015. It engages systemically with the largest global greenhouse gas emitters, and with other companies that have significant opportunities to drive the clean energy transition and achieve the goals of the Paris Agreement. By the end of 2019, 320 investors with more than USD 33 trillion in assets under management had signed up to this initiative.

In addition, in 3Q 2019 we joined two new investor collaborations:

4. Investor Initiative for Sustainable Forests' which is focused on mitigating deforestation in the Amazon across cattle and soy producers
5. 'Mining & Tailings Safety Initiative' which was launched in the wake of Vale's Brumadinho dam disaster in January 2019 causing c. 270 deaths

Tier 3: The third tier of our engagement is conducted by Sustainalytics. This engagement is designed to address issues that arise in relation to companies' failings on governance issues and/or significant deviations from relevant international norms and standards such as the UN Global Compact, OECD Guidelines for Multinational Enterprises, as well as human rights and environmental conventions.

Proxy Voting:

The overarching purpose of our voting is to protect and promote the rights and long-term interests of our clients as shareholders. We consider it our responsibility to engage with and challenge companies' management to ensure that the issuers we invest in on our clients' behalf are well-run, adhere to their strategy and deliver shareholder value. We aim to support a strong culture of corporate governance, effective management of environmental and social issues and comprehensive reporting according to credible standards.

Our proxy voting guidelines are based on generally accepted standards of best practice in corporate governance including board compensation, executive remuneration, risk management and shareholder rights.

To assist us in performing our proxy voting responsibilities, Pictet Asset Management uses the services of third party specialists to provide research and to facilitate the execution of voting decisions at all relevant company meetings worldwide.

Third party specialists are tasked with collecting meeting notices for all holdings and researching the implications of every resolution according to Voting Guidelines defined by Pictet Asset Management. All recommendations are communicated to relevant Investment teams and the Environmental Social Governance 'ESG' team.

Pictet Asset Management always reserves the right to deviate from third party voting recommendations on a case by case basis in order to act in the best interests of our clients. Such divergences may be initiated by Investment teams[1]: or by the ESG team and must be supported by written rationale.

In instances when consensus cannot be reached between the Investments teams and ESG team, the decision is escalated to relevant CIOs and, if necessary, the Head of Investments.

The following principles are used to define the scope of accounts and securities eligible for proxy voting[2]:

For actively managed funds, we aim to vote on 100 per cent of equity holdings.

For passive strategies, we aim to vote on companies representing 80% by weight of underlying benchmarks. This target may be revised upwards or downwards for specific strategies depending on factors such as portfolio size, geography or market capitalization.

For segregated accounts, including mandates and third-party (i.e. sub-advisory) mutual funds managed by Pictet Asset Management, clients who delegate the exercise of voting rights to us have the choice between Pictet Asset Management's policy or their own voting policy.

[1]The Indexation team retains the right to take part in the decision-making process on a case-by-case basis

[2] This activity does not include indirect investments through third-party funds that we invest in on behalf of our clients, where we expect those managers to exercise their votes according to their own policy and report accordingly to relevant Pictet Asset Management entities.

Additional information. [Optional]

In addition to our investment in corporates, we also invest in a number of sovereign issuers for our fixed income strategies. In order to do this well, we need to have a comprehensive understanding of factors that could drive or hinder long-term growth prospects for those countries.

Factors that we may raise include education, social reform, health issues, environmental degradation or depletion of natural resources, and inequality. As one can imagine, when we raise some of the more sensitive topics, we wish that it will increase their awareness of such issues and eventually implement policies to address them.

----------------	--

Negative screens (exclusion of controversial weapons and countries under UN sanctions) apply to all actively managed fixed income strategies.

Positive screens (best-in-class) are either developed internally or provided by clients (for segregated accounts).

Norms-based approaches are implemented for certain funds and segregated accounts where we apply internally or externally defined exclusion lists.

(C) Implementation: Integration

FI 10	Mandatory	Public	Descriptive	PRI 1
-------	-----------	--------	-------------	-------

FI 10.1**Describe your approach to integrating ESG into traditional financial analysis.**

Our investment processes currently take into account certain ESG factors. Good companies typically have good business practices in corporate governance, environmental and social issues. Whilst the investment team takes these issues into account as part of the fundamental analysis, these criteria are not the main criteria for the investment team to exclude or include positions in the portfolio. That said, there are certain tools and data sources at the disposal of the team which aid in the decision-making process.

ESG data is available within our proprietary portfolio management tool, PAMFolio. These have been available to the investment team since 2014 and include for example:

- ISS Governance scores and reports
- Sustainalytics Controversy scores, Corporate governance scores, ESG Risk ratings (covering all three of E, S and G), product involvement and respective reports
- CFRA Creative Accounting reports
- Carbon data (direct emissions and fossil fuel reserves)

Rating alerts have been put in place by the Fixed Income Risk Team so that our team is quickly able to detect a deterioration (or improvement) in these scores. These alerts take the form of an automatic daily report sent by email to all investment teams, tailored to their respective universe, and any further investigation can be carried out by examining the historical data in the Fixed Income Risk Team's Tableau database.

In terms of hard exclusions, we systematically exclude companies that are involved in cluster ammunition, anti-personnel landmines, chemical & biological weapons as defined by the Pictet Group Directive on Controversial Weapons. Country exclusions are also defined by a Pictet Group directive and enforced using a pre-trade check in PAMFolio.

FI 10.2**Describe how your ESG integration approach is adapted to each of the different types of fixed income you invest in.****SSA**

On the sovereign side we are actively incorporating ESG factors into investment analysis as they help enhance decision making, makes a positive impact on long term performance and help avoid key, often hidden areas of risk.

Our highest convictions are as follows:

- Economic growth which is not inclusive is not sustainable, i.e. look beyond GDP
- "Excessive" natural wealth destruction hurts potential growth, i.e. countries are borrowing against the future
- Quality of institutions and rule of law improves resilience, e.g. during economic downturns, political instability
- Developing a forward-looking view of government stability is key

These convictions helped us develop a proprietary sovereign ESG score, calculated by the Fixed Income Risk & ESG teams, which is accessible to sovereign Portfolio Managers, Analysts and Risk Managers.

Pictet Asset Management has formulated an Engagement process for sovereigns. We believe that pushing for change, including as bondholders, can be a valued part of our investment management offering.

Corporate (financial)

ESG information covering corporate governance, controversies and accounting concerns is held in a central database which is available to all investment staff and monitored by the risk team. Each investment team is responsible for incorporating the ESG data that has been made available to them into their own investment process. As such, there is no standard approach for our Corporate Bond teams and some examples of how this has been applied by different teams can be found in the final FI section of this assessment (FI 18).

Pictet Asset Management has formulated an Engagement process for corporates. We believe that pushing for change, including as bondholders, can be a valued part of our investment management offering.

Corporate (non-financial)

ESG information covering corporate governance, controversies and accounting concerns is held in a central database which is available to all investment staff and monitored by the risk team. Each investment team is responsible for incorporating the ESG data that has been made available to them into their own investment process. As such, there is no standard approach for our Corporate Bond teams and some examples of how this has been applied by different teams can be found in the final FI section of this assessment (FI 18).
